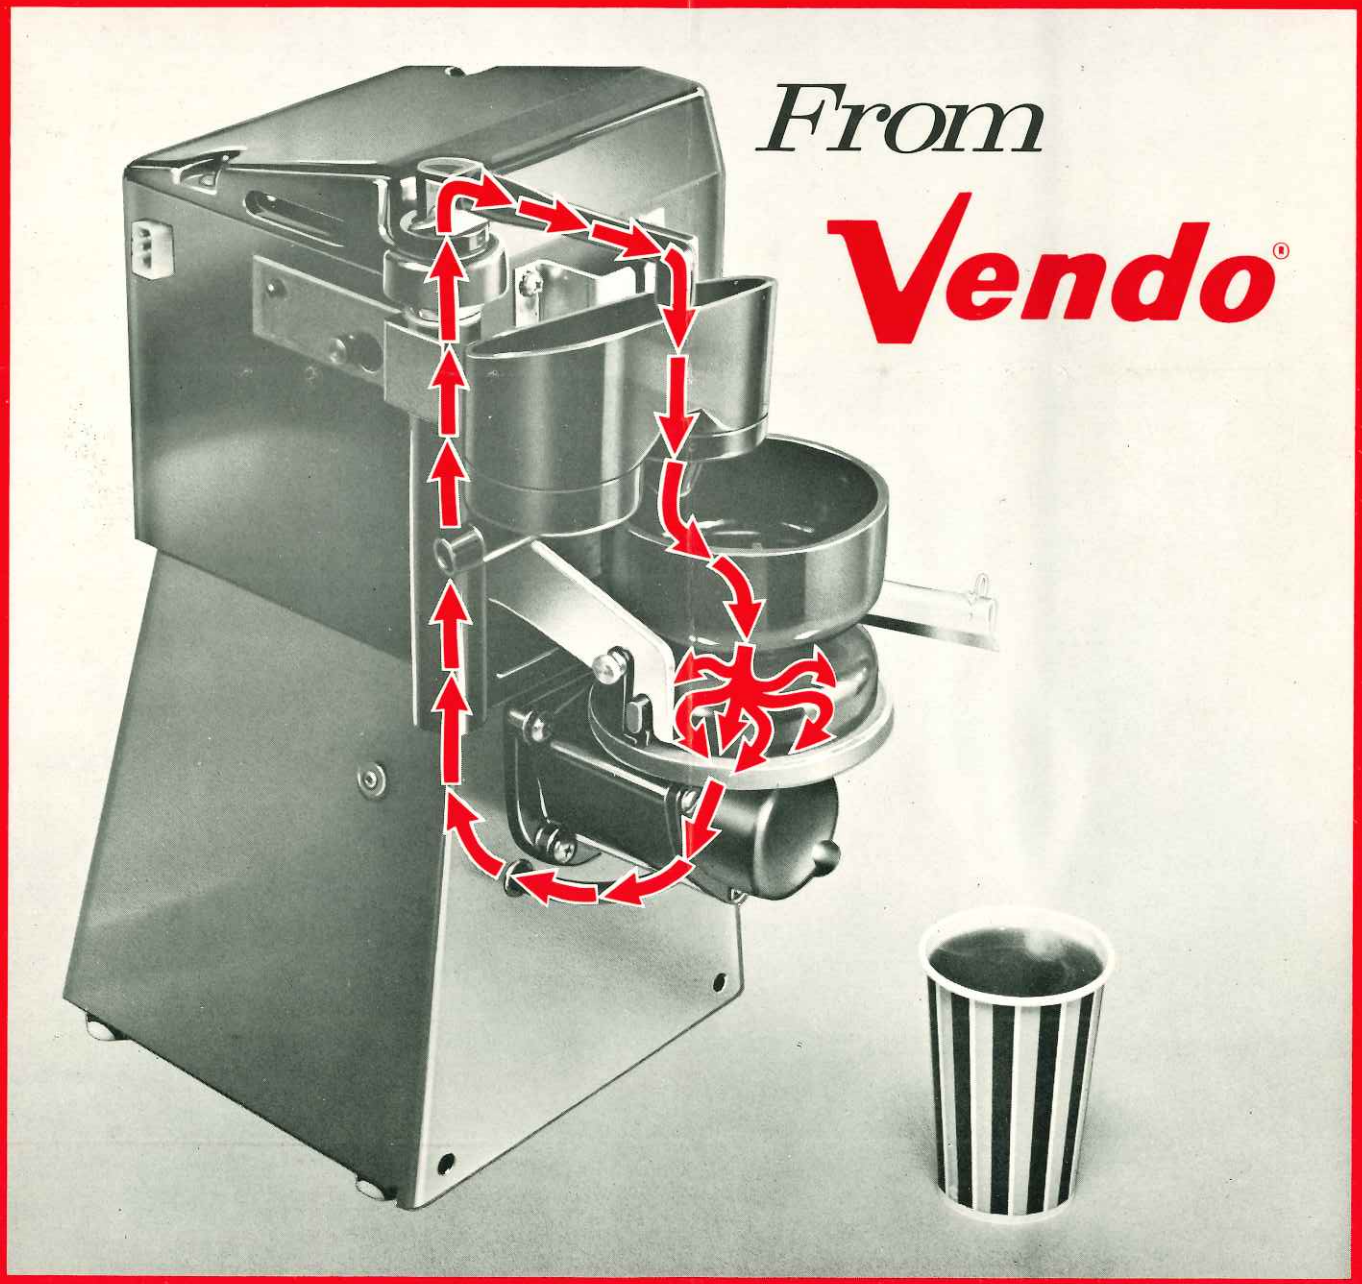
The most significant development in coffee brewing since the single cup...

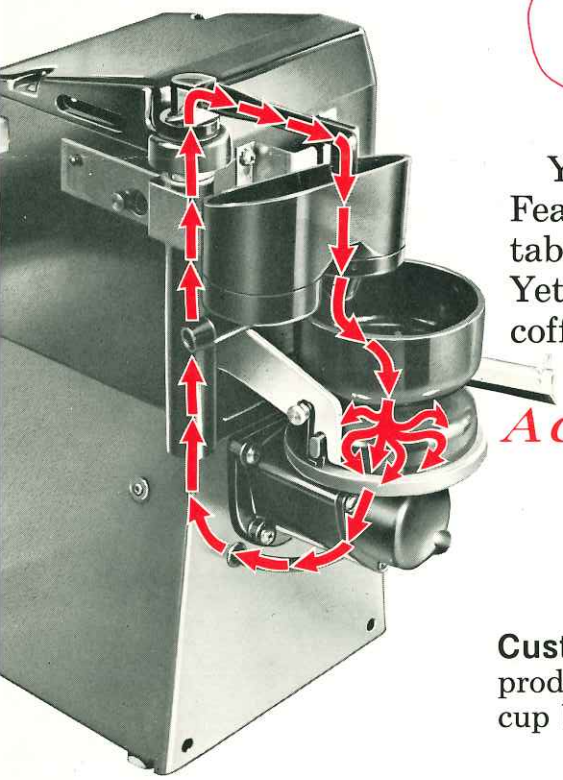


222/189 NAMA CONVENTION OCT. 1972

t took 2½ years, but we have it.

A Recirculating Coffee Brewer With High Extraction, Low Sediment And Long Life

...Without Filter Paper.



You told us what you wanted in a coffee brewer. Features like: Simplicity, low cost, compactness, portability, high extraction, easy service and sanitization. Yet, you wanted to vend a superb, clear, clean cup of coffee. Here it is.

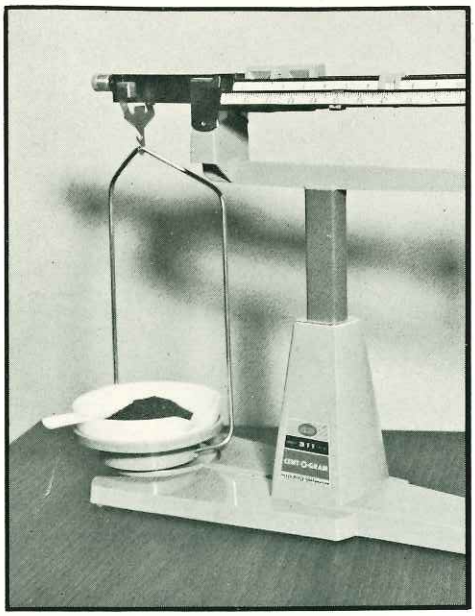
A coffee brewer that brings customers back ... again and again.

Customers Get Superb Flavor—The recirculating concept produces a richer, more full-bodied flavor than any other single cup brewer.

222/189.6

Customers Get a Clear, Clean Cup of Coffee—

It is proven that coffee is its own best filter. This is the only brewer on the market to capitalize on this fact. "Mud" picked up the first time through the recirculation process is deposited on top of the grounds on the next trip. This means that, each time through, the coffee becomes clearer.



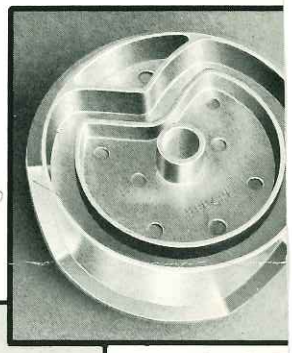
½ GRAM LESS COFFEE

Get The Same High Extraction and Flavor Using 1/2 Gram Less Coffee! — The exclusive recirculation system of the new Vendo brewer gives fuller extraction on the same gram throw as any competitor when both brewers are perfectly adjusted and clean.

The Vendo brewer does not lose efficiency as you operate because the screen does not clog or the water channel as with brewers in competitive equipment.

Only the new Vendo brewer gives the same high extraction after 5,000 or 100,000 vends without sanitizing. The screen doesn't clog because of three unique features — the wiper blade, pump suction and a coarser screen.

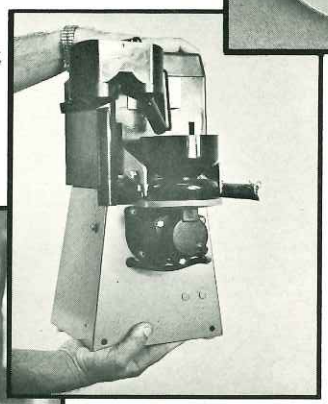
A coffee brewer that doesn't bring you back ... again and again.



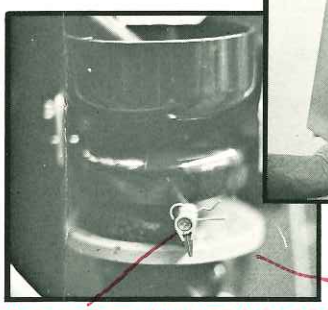
SINGLE CAM

You Get Trouble-Free Operation — Check these features. They add up to less problems — more profit — for you.

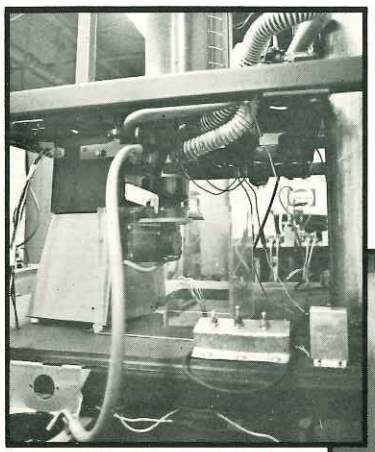
- ✔ All moving parts operate off a single cam. This makes it impossible to get out of synchronization.
- ✔ No timing or pressure adjustments.
- ✔ No significant wear factor.
- ✔ Simple, trouble-free design.
- ✔ Complete portability.
- ✔ Pump suction and wiper blade keep screen from clogging.
- ✔ Durable rotor vane pump.



PORTABILITY



WIPER BLADE ELIMINATES CLOGGING



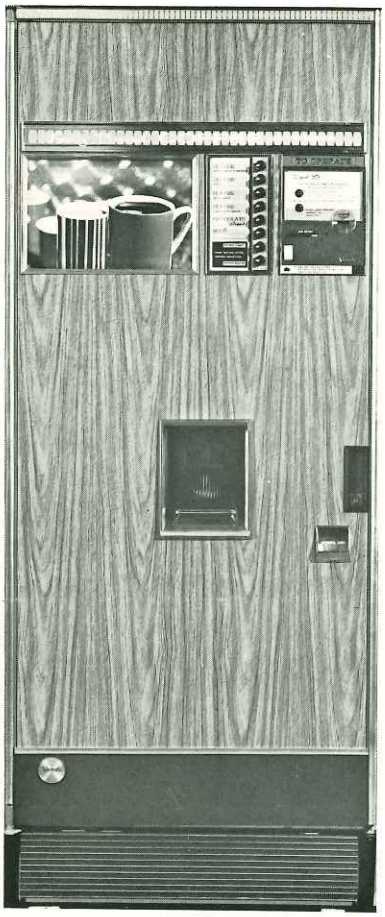
LIFETIME TESTING

EASY SANITIZING

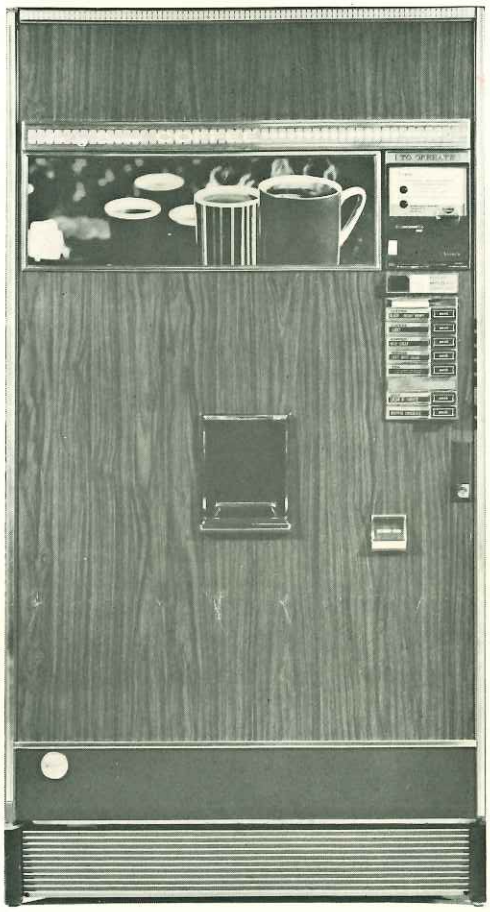
You Get Long Life — Life tests on mechanical parts have reached over 800,000 vends! The hydraulic parts and brew screens have gone through over 500,000 vends. And, they are still in excellent condition. Test engineers expect two to three times this usage before any failure occurs.

You Get Fast, Thorough Sanitizing — By simply running urn cleaner rapidly through all coffee handling surfaces, this brewer sanitizes itself faster and more thoroughly than any other brewer. Another plus for you.

Brew Up Better Profits With These Vendo Units!



HBA-7
About 650, 7-ounce cup capacity



HBA-8
About 900, 7-ounce cup capacity

If you would like further information please let us know. We'll be happy to show you why your best coffee investment is Vendo—with the revolutionary coffee brewer.
